- Webcast replay will be available on the Achaogen website at www.achaogen.com and will be archived for 30 days following the presentation

About Achaogen

Achaogen is a biopharmaceutical company passionately committed to the discovery, development, and commercialization of innovative antibacterial treatments for MDR gram negative infections. Achaogen's first commercial product is ZEMDRI, for the treatment of adults with complicated urinary tract infections, including pyelonephritis. The Achaogen ZEMDRI program was funded in part with federal funds from the Biomedical Advanced Research and Development Authority (BARDA). The Company is currently developing C-Scape, an orally administered beta-lactam/beta-lactamase inhibitor combination, which is also supported by BARDA. Achaogen is also developing a new aminoglycoside program, which is supported by CARB-X. All product candidates are investigational, have not been determined to be safe or efficacious, and have not been approved for commercialization. For more information, visit the Achaogen website at www.achaogen.com.
